Proactive and results-oriented software developer with a solid academic background from the Universidad Autónoma de Guadalajara and two years of specialized experience in full-stack web development. Throughout my professional career, I have developed the ability to design and implement scalable technological solutions, ranging from process optimization systems to applications for any platform with complex database architectures. Committed to continuous learning and passionate about creating technology that generates a positive impact, I aim to contribute my technical expertise and innovative perspective to a development team.

Education

Bachelor's Degree in Software Engineering   **Jalisco, México**
Universidad Autónoma de Guadalajara   *february – july 2024*
